

Additive 4030

Product Application:

Additive 4030 is a concentrated additive designed for defoaming CIP solutions while improving the cleaning characteristics. Difficult cleaning applications that generate foam are easily controlled with Additive 4030. It is economical and efficient at defoaming caustic solutions, and Additive 4030 can save you money by adding only the amount of defoamer needed for the soil load.

Properties:

Pounds per gallon: 9.3

Specific gravity: 1.12

Foaming properties: No foam

Use Directions:

Additive 4030 is designed to be used at 0.1-1% depending on the foam level, soil and the concentration of caustic. Additive 4030 can be used through mixing stations to blend with caustic. Contact your **PureLabs** representative to work with you to design the concentration right for your facility.
