

HT Alkali 2075 C

Product Application:

HT Alkali 2075 C is a concentrated premix used to produce our HT Alkali 2070. HT Alkali 2070 is a premium blended low foaming caustic cleaner especially designed for circulation and boil out operations on high temperature processing equipment in the dairy and food processing industries. HT Alkali 2075 C contains an advanced blend of surfactants, threshold agents and chelators that when blended with 50% liquid caustic soda will clean tough protein and burnt-on soils while handling difficult water hardness and heavy saturated soils.

Use Directions:

HT Alkali 2075 C is designed to be blended with liquid caustic soda to manufacture our HT Alkali 2070 under a manufacturing agreement. HT Alkali 2075 C can also be blended at use at the end customer facility. HT Alkali 2070 is designed for heavy soil conditions in CIP, HTST, Evaporator, Oven or Fryer cleaning, with usage rates of 1-3% solution at 145-185°F for 30- 60 minutes. Your **PureLabs** representative will work with you to design the best cleaning program for your facility.
