

HT Caustic 2080

Product Application:

HT Caustic 2080 is a low foaming premium built powdered alkali cleaner containing no chlorine and designed for difficult high temperature cleaning applications. HT Caustic 2080 is strong enough to handle the most difficult and yet economical. The complex surfactants and builders in HT Caustic 2080 make it an excellent bottle wash or HTST cleaner dissolving the most difficult soils while maintaining free rinsing characteristics.

Properties:

pH 1% solution ≥ 12.5

Foaming properties: Very low foam

Use Directions:

HT Caustic 2080 is designed for use in a variety of cleaning applications including bottle washing and HTST systems. For cleaning in heavy soil conditions, solution strength of 1-2% will work for most soils. For other cleaning applications or specific cleaning recommendations contact your **PureLabs** representative who will design the best cleaning program for your facility.
